IT Skills Education Requirements

Skopje, January 2005

IT Skills Education Requirements Workshop

Members of the beneficiary universities were delegated to the National Task Force for the purpose of developing National Strategy for Information Society Task Force. On a special occasion on 15th January 2005 the workshop for IT skills education requirements was organized.

Several studies were analyzed in order to have overview of the current situation for IT infrastructure and level of IT skills of population in Macedonia and IT skills of IT specialists. There were several discussions to exploit and analyze the situation and give directions for further needs and development. The conclusions from this workshop were implemented in the national strategy.
