## **Workshop for Advanced Mobile Technologies Curricula Analysis and Definition**

The workshop was used to analyze and define new curricula for the advanced mobile technologies course. At the same time, this visit was used to discuss details for forthcoming teacher retraining group visit with Prof D-r Kostas Margaritis.

We have also used experiences from Mobile Summit 2006 Proceedings held in Mykonos where newest trends in mobile technologies were presented and experiences from the use of existing technologies were given, in order to organize the course curricula.
