Bitola, April 2007

Workshop – Software Project Management presentations

This event was dedicated to the students to present the Software Project Management Tools. It realizes both fourth and fifth project outcomes for developing new teaching materials and new teaching training. The presentation given by Prof. Marjan Gusev concerned analysis and concepts of software project management tools, and M. Sc. Goce Armenski has demonstrated practical usage different ICT tools. The students have demonstrated their homework and project assignments and discussed details for its successful termination. They presented sufficient skills and knowledge in software project management.
