

TEMPUS PROJECT CD JEP 18046-2003
Management and (e)Business Education in
Computer Studies

Workshop:

Workshop at Interex HP/MOUG Conference

Ohrid, October 2006

Workshop at Interex HP/MOUG Conference

The conference is the biggest IT event in the Republic, where more than 200 participants take part. The conference is mainly sponsored by HP and Oracle users that work in IT related industry. This was a really good event to present the improvements that our project has made in reconstruction of curricula and by adopting and adapting the curricula to industry needs. These events are requirement to hear the voice of student next employers and realize real programs that recruit staff with sufficient knowledge and skills.

A Workshop for dissemination of project results was organized in parallel to the conference. Several presentations were given within the project scope. Prof. Marjan Gusev gave presentation about “Knowledge Management and Innovative Technologies”. This presentation consists of innovation in curricula and new teaching methods. M. Sc. Anastas Misev helped in presentation of the new teaching methods with wireless remotes to support learning process based on the projects’ interactive response learning system. Mr. Goce Armenski gave presentation about project deliveries “Professional practice and complementary education in CS and IT curricula” (prepared together with Prof. Vladimir Radevski.) He also presented the best practice of usage of e-Testing system.

All presentations gave overview of the project and were realized according the project dissemination activities.
