

- 12th – 16th June 2005 – Workshop for Curricula Upgrade and Teaching Methods, Thessaloniki, GR

The curricula upgrade workshop was held at the University of Macedonia – Thessaloniki in the period of 12th – 15th June 2005. The meetings were realized at the premises of University of Macedonia. One session on the workshop concerned presentations about general education organization in Greece and ICT studies. UOM organizes two studies at Department of Applied Informatics and Department of Technology Management. A lot of details were given for realization of these studies. A special attention was given to realization of ECTS and Diploma Supplement.

The library information system was also explained with details about its usage and other related services that include bibliography, citation analysis etc. The students are given possibility to use extensive digital and conventional library with web accessible and user friendly interface.

There were presentations on distance education packages and course management environments that are used at UOM, then the ECTS procedures and practices, and the usage of the library information system. A series of presentations were given for special software packages used for course management system based on Moodle environment. Also the relevant data was presented for the level of usage of Course Management systems at UOM in percentage of total number of students and professors that use the system. The overall presentation gave idea about all e-Learning tools used for both teaching and learning process.
